

1-Zone touch-screen thermostat for:

- 1-speed radiant heater
- Forced-air heaters except Modulating option
- Generator
- Hot water forced-air heaters

TM2Evo

1. Introduction

1.1. Abbreviations

- MON: Monday
- TUE: Tuesday
- WED: Wednesday
- THU: Thursday
- FRI: Friday
- SAT: Saturday
- SUN: Sunday

1.2. General information

1.2.1. Manufacturer's liability

Our products are manufactured in line with the requirements of the different applicable European directives and are hence delivered with the CE marking and all required documents.

Always concerned by the quality of our products, we are constantly looking to improve them. We thus reserve the right to change the features shown in the present document at any time. Our liability as manufacturer cannot be invoked in the following cases:

- Failure to follow the instructions for use of the equipment.
- Defective or inadequate servicing of the equipment.
- Failure to follow the installation instructions for the equipment.

1.2.2. Fitter's responsibility

The fitter shall have the responsibility for the equipment installation and commissioning. The fitter must observe the following instructions:

- Reading and following the instructions given in the manuals supplied with the equipment.
- Performing the installation in line with the legislation and standards in vigour.
- Performing the first commissioning and follow all required check points.
- Explaining the installation to the user.
- If servicing is needed, notify the user about the obligation to check and service the equipment.
- Handing over all manuals to the user.

SOLARONICS Chauffage SAS. 78 rue du Kemmel – CS20302 – 59429 ARMENTIERES CEDEX France
Telephone: 03.20.10.59.59 - Fax: 03.20.35.57.22
Website: <http://www.solaronics.com/>

1.2.3. User's responsibility

In order to ensure an optimum operation of the equipment, the user has to observe the following instructions:

- Reading and following the instructions given in the manuals supplied with the equipment.
- Using qualified professionals for the installation and first commissioning.
- Asking the fitter to explain the installation.
- Performing required inspection and servicing.
- Keeping the manuals in good condition near the equipment.

2. Safety instructions and recommendations

2.1. Safety instructions

DANGER

The thermostat is electrically powered equipment, hence must be connected to the earth of the installation

DANGER

Opening the thermostat box is not required within the framework of its normal use. This operation is required only during its installation and/or repair by authorized personnel.

2.2. Recommendations

WARNING

Only an authorised professional is allowed to work on the equipment and on the installation.

- Prefer the frost protection mode of the thermostat over the power-down of the equipment in order to protect the building from frost
- Install the thermostat at eye level.
- Read all instructions in order to have full use of our product.
- Do not disclose the means of unlocking the equipment

“DO NOT” LIST

- Do not install the thermostat near a source of heat because this will affect its operation
- Do not press the LCD screen insistently, otherwise you will irreversibly damage the liquid crystal screen.

SOLARONICS Chauffage SAS. 78 rue du Kemmel – CS20302 – 59429 ARMENTIERES CEDEX France
Telephone: 03.20.10.59.59 - Fax: 03.20.35.57.22
Website: <http://www.solaronics.com/>

3. Description

3.1. SOLARONICS Heating equipment

3.1.1. 1-Zone touch-screen thermostat for gas forced-air heaters:

The thermostat is designed for controlling only the following equipment in the Solaronics Heating range:

- **MH Eco** Minigaz helical forced-air heaters
- **MV Eco** Minigaz vertical forced-air heaters
- **MC Eco** Minigaz centrifugal forced-air heaters

For this equipment, provide a **3510232** defect reporting cable (one cable per equipment)

- **MRA-H** gas hot air curtains

3.1.2. 1-Zone touch-screen thermostat for one-speed radiant heater:

The thermostat is designed for controlling only the following equipment in the Solaronics Heating range:

- SRII 1-Speed radiant panels
- 1-speed radiant tubes

3.1.3. 1-Zone touch-screen thermostat for generator and AECs [hot water forced-air heaters]

The thermostat is designed for controlling only the following equipment in the Solaronics Heating range:

- One- and two-speed Burner Generator with 2nd speed speed air switch
- Single- and three-phase hot water forced-air heaters
- Termogaz gas fan coil

Contact us prior to any other application.

SOLARONICS Chauffage SAS. 78 rue du Kemmel – CS20302 – 59429 ARMENTIERES CEDEX France
Telephone: 03.20.10.59.59 - Fax: 03.20.35.57.22
Website: <http://www.solaronics.com/>

3.2. Accessories

The thermostat operates autonomously but it is also possible to connect the following accessories to the thermostats for hot air equipment:

- **9432423** Offset ambient temperature sensor for hot air

3.3. Operating principle

3.3.1. Radiant heater - Generator and AEC [Hot air forced-air heaters]

The TM2Evo thermostat is used for controlling one or more radiant equipment units.

The TM2Evo thermostat is used for controlling one hot air generator.

The TM2Evo thermostat is used for controlling one or more hot water forced-air heaters.

In heating mode, all equipment is controlled depending upon the temperature set-point determined by the thermostat according to its programming.

3.3.2. Forced-air heaters

The TM2Evo thermostat is used for controlling one or more Minigaz forced-air heaters, with a pilot wire:

- In heating mode, all equipment is controlled depending upon the temperature set-point determined by the thermostat according to its programming.
- In the event of a combustion fault of one or more connected items of equipment, a fault indicator light comes on.
- When the fault indicator light is on, you can restart all defective equipment, from the thermostat
- In fan mode, all equipment items are constantly controlled with regard to ventilation, without taking the thermostat programming into account

The TM2Evo thermostat is used for controlling one or more MRA-H hot air curtains, with a pilot wire:

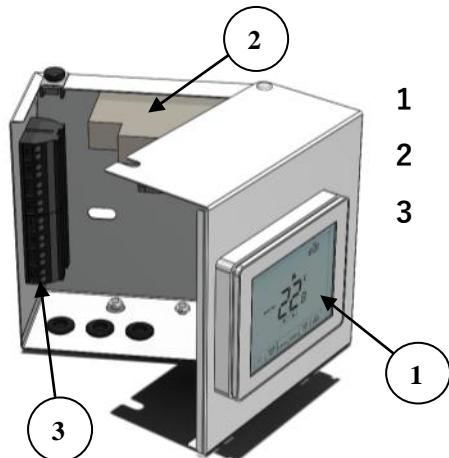

- In heating mode, all equipment is controlled depending upon the temperature set-point determined by the thermostat according to its programming.

SOLARONICS Chauffage SAS. 78 rue du Kemmel – CS20302 – 59429 ARMENTIERES CEDEX France
Telephone: 03.20.10.59.59 - Fax: 03.20.35.57.22
Website: <http://www.solaronics.com/>

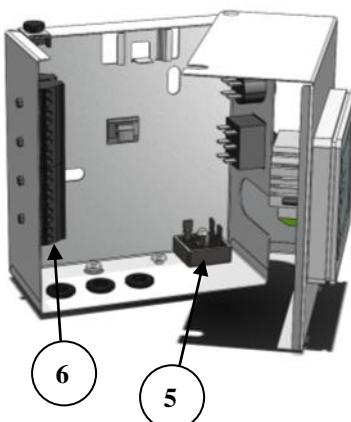

3.4. Main components

3.4.1. Radiant heater - Generator and AEC [Hot air forced-air heaters]

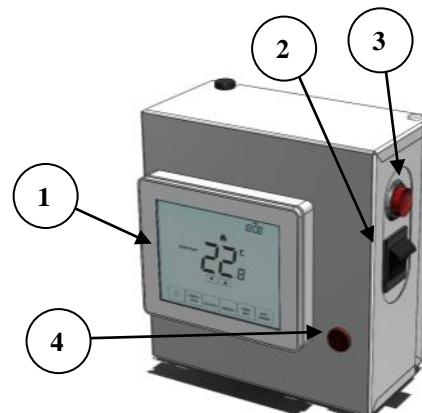

- 1 Touch-screen thermostat
- 2 Control relay
- 3 Connection terminal

3.4.2. Forced-air heaters

- 1 Touch-screen thermostat
- 2 Fan/Off/Heating switch
- 3 Restarting push-button
- 4 Fault indicator light
- 5 Bridge rectifier
- 6 Connection terminal

3.4.3. Description of actuators for forced-air heaters

The 3-position switch is used to control the following functions:

- Top position = Heating: forced-air heaters/curtains work In heating mode depending upon the request controlled by the touch-screen thermostat
- Central position = Off: forced-air heaters/curtains are not active. On the other hand, they are still powered
- Bottom position = Fan: forced-air heaters constantly work In fan mode

The fault indicator light indicates a burner fault on one or more forced-air heaters. In this case, and in this case only, press the restarting button for a few seconds to cancel the fault.

SOLARONICS Chauffage SAS. 78 rue du Kemmel – CS20302 – 59429 ARMENTIERES CEDEX France
Telephone: 03.20.10.59.59 - Fax: 03.20.35.57.22
Website: <http://www.solaronics.com/>

3.5. Control panel – Description of a touch-screen thermostat

The touch-screen thermostat is used to programme a temperature set-point for each day of the week, with 4 comfort periods a day and a frost protection mode.

ROOM TEMP Indicates the currently measured temperature (internal sensor)

FLOOR TEMP Indicates the currently measured temperature (offset sensor)

SET Indicates the temperature set-point

SCREEN Screen cleaning

Indicates that the equipment is in the long-term frost protection mode

Indicates that the thermostat interface is locked

Indicates that the heating is not under call-for-heat, and that the frost protection mode is activated.

Indicates that heating is under call-for-heat. It flashes when the optimum start mode is activated.

SOLARONICS Chauffage SAS. 78 rue du Kemmel – CS20302 – 59429 ARMENTIERES CEDEX France
Telephone: 03.20.10.59.59 - Fax: 03.20.35.57.22
Website: <http://www.solaronics.com/>

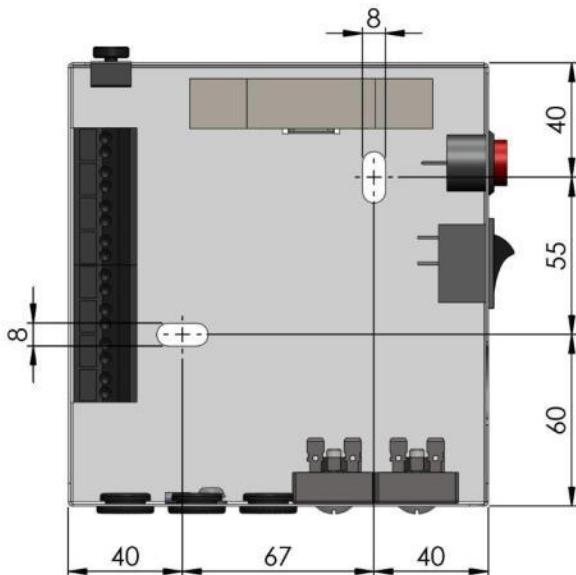

4. Installation

The thermostat (or, where appropriate, the offset sensor) must not be installed directly within the hot air flow of the heating equipment, nor on a cold wall. It should rather be installed in a neutral, unperturbed place, which would be representative of the average temperature of the zone to be controlled.

To install the equipment, it must be opened: loosen the screw located on the upper side, then pivot the door.

4.1. Wall mounting

To install the equipment on a wall, drill 2 holes according to the following centre distances:

5. Electrical connection

Bringing all connecting wires to the same switchboard is recommended when one or more thermostats are connected to the same installation (control of several zones),

WARNING

The power supply will be connected to the general heating cut-off switch in order to ensure a complete power-down.

- The UTE C15-100 standard and best practices must be followed.
- Connected or surrounding equipment must not cause strong interference (directive 2004/108/EC)
- Refer to § Connection diagrams.

SOLARONICS Chauffage SAS. 78 rue du Kemmel – CS20302 – 59429 ARMENTIERES CEDEX France
Telephone: 03.20.10.59.59 - Fax: 03.20.35.57.22
Website: <http://www.solaronics.com/>

6. Equipment operation

6.1. Equipment commissioning

The touch-screen thermostat is used to program a temperature set-point for each day of the week, with 4 comfort levels a day and a frost protection mode.

To start the thermostat, press  twice.

6.2. Display of measured values

As soon as the thermostat is activated, it displays the value of the currently measured temperature.

6.3. Setting modification

6.3.1. Set the time and the date

Press  at length, then press .

Use the   keys to set the hour, then confirm with .

Use the   keys to set the minutes, then confirm with .

Use the   keys to set the day, then confirm with .

Use the   keys to set the month, then confirm with .

Use the   keys to set the year

Confirm by pressing  and then start the thermostat by pressing .

6.3.2. Customise a weekly program

The thermostat is active:

- either in "week / week-end" mode with 4 identical comfort periods for week days and 4 identical ones for Saturday and Sunday
- or in "7-day" mode with 4 comfort periods a day, which can be different from one day to another
- or in "24h" mode with 4 comfort periods a day, identical from one day to another

For selecting a mode, see § 6.5 :

Programming mode: none, 5/2 days, 7 days or 24h

For every period, enter the starting time and the corresponding temperature set-point.

SOLARONICS Chauffage SAS. 78 rue du Kemmel – CS20302 – 59429 ARMENTIERES CEDEX France
Telephone: 03.20.10.59.59 - Fax: 03.20.35.57.22
Website: <http://www.solaronics.com/>

With the thermostat powered and on, press **EDIT**, select the day with **DAY** then confirm with **NEXT**

The first period of the day, "**WAKE**" flashes, with its starting time at the top and with its temperature set-point in the centre

Change the starting time with the **▼ ▲** keys at the top

Change the set-point with the **▼ ▲** keys in the centre

Go to the next period with **▶**

Repeat the operation with the 3 other periods: "**LEAVE**"

"RETURN" and **"SLEEP"**

You can specify a smaller number of periods by entering - - . - - for the starting time. The temperature set-point also displays " - - - "

Press **DONE** to confirm

6.3.3. Temporary manual set-point

- You can check the temperature set-point at any time. You only need to use the **▼ ▲** keys to change the current set-point. "**SET TEMP**" is displayed. Press **DONE** to confirm.

This override is active until the start of the next comfort period which is displayed at the top of the thermostat.

- To override the temperature set-point for a determined length of time, press **HOLD** and then use the **▼ ▲** to specify the length of time of the override in hours, press **NEXT** and then set the desired minutes and temperature set-point using the **▼ ▲** keys. Press **DONE** to confirm.

"HOLD LEFT" is displayed along with the time remaining until the return to the program.

6.3.4. Keyboard locking

The thermostat has a locking mechanism for the keyboard. To activate this function, press **HOLD** for 3 seconds.

"0000" is displayed

To save a locking code, use **▼ ▲** for specifying the first two digits, press **NEXT** and then set the two other digits using the **▼ ▲** keys. Press **DONE** to confirm.

WARNING

Carefully note the code

SOLARONICS Chauffage SAS. 78 rue du Kemmel – CS20302 – 59429 ARMENTIERES CEDEX France
Telephone: 03.20.10.59.59 - Fax: 03.20.35.57.22
Website: <http://www.solaronics.com/>

Once the locking is activated, is displayed.

To unlock the thermostat, press any key, then enter the code, in the same way.

6.3.5. Frost protection mode

Press once to activate the continuous frost protection mode.

The symbol is displayed along with the “**Frost Protection**

Active” message, and when heating is under call-for-heat, the

icon is displayed. Press again to deactivate the frost protection mode.

To deactivate the frost protection mode for a determined length of time, press and then enter the date of end:

Use the keys to set the hour, then confirm with

Use the keys to set the minutes, then confirm with

Use the keys to set the day, then confirm with

Use the keys to set the month, then confirm with

Use the keys to set the year, then confirm with

- Press to confirm.

- The symbol is displayed, along with the “**Frost Protection Active**” message

- To deactivate the frost protection mode, press and then

SOLARONICS Chauffage SAS. 78 rue du Kemmel – CS20302 – 59429 ARMENTIERES CEDEX France
Telephone: 03.20.10.59.59 - Fax: 03.20.35.57.22
Website: <http://www.solaronics.com/>

6.3.6. Return to factory values

To activate the factory values of the thermostat, press  for 3 seconds and then  for 10 seconds.
Select “**I**” with the   keys
Press  to confirm, then press 

The thermostat will restart

The factory values for the parameters are the following:

Week days	Time	Temperature
Wake-up	07h00	21° C
Start	09h00	16° C
Return	16h00	21° C
Night	22h00	16° C

Saturday-Sunday	Time	Temperature
Wake-up	09h00	21° C
Start	22h00	16°C
Return	--.--	--° C
Night	--.--	--° C

6.4. Installation shut-down

To turn off the thermostat, press at  at length until  and  are displayed. Wait then for a few seconds until the screen turns off.
Or turn the switch on the right-hand side to the **ARRET** [OFF] position (only equipped models). In such a case, the display stays activated.

6.5. Configuration

With the thermostat powered and on, press  for 3 seconds, then  and then 
Use the   keys from the top for selecting the parameter to be changed.
Use   keys from the centre to set the parameter
Press  to confirm the entry

Parameter	Description	Values
01	Display unit for temperature	00 = ° C (factory) 01 = ° F

SOLARONICS Chauffage SAS. 78 rue du Kemmel – CS20302 – 59429 ARMENTIERES CEDEX France
Telephone: 03.20.10.59.59 - Fax: 03.20.35.57.22
Website: <http://www.solaronics.com/>

Parameter	Description	Values
02	Switch differential below the set-point	0.5° C to 3° C 1.0° C (factory)
03	Delayed heating	by 0 to 15 minutes 0 (factory)
04	Authorisation for using the keys for changing the set-point, except when the thermostat is locked	00 = full authorisation (set-point between 5° C and 35° C – factory) From +- 01° C to +- 10° C
05	Selection of the room sensor integrated into the thermostat or offset sensor.	00 = integrated sensor (factory) 02 = offset sensor ("FLOOR TEMP" is displayed on the screen)
06	Limit temperature (Floor Temp)	28° C by default It is recommended to set this parameter to 45° C
07	Optimum start (preheating). The thermostat takes into account the building's thermal inertia so that the set-point is reached at the expected time.	00 = Disabled (factory) 01 = 1h, 02 = 2h, 03 = 3h, 04 = 4h, 05 = 5h
08	Number of minutes for raising the ambient temperature by 1° C. This time is adjusted with the periods and the seasons.	For information only
09	Programming mode: 5/2 days or 7 days or 24h or non-programmable	00 = 5/2 days (factory) 01 = 7 days 02 = 24 h 03 = non-programmable
10	Automatic change winter time / summer time	00 = no (factory) 01 = yes
11	Parameter not used	

SOLARONICS Chauffage SAS. 78 rue du Kemmel – CS20302 – 59429 ARMENTIERES CEDEX France
 Telephone: 03.20.10.59.59 - Fax: 03.20.35.57.22
 Website: <http://www.solaronics.com/>

Parameter	Description	Values
12	Number of control time slots per day	00 = 4 (factory) 01 = 6

6.6. Temperature calibration

This function is needed in the event that the thermostat would display a temperature offset with respect to a measured value.

Press  until **SETUP** and **CLOCK** are displayed.

Press  again for 10 seconds

Use the   keys to display the actual temperature

Press **DONE** to confirm

Press  to restart the thermostat.

7. Inspection and servicing

7.1. Screen cleaning

To clean the screen without changing the settings, press “**SCREEN**” which deactivates all keys for 15 seconds.

Use wipes for LCD screens or a cleaning agent for LCD screens and a clean micro-fibre cloth.

8. In the event of a disturbance

8.1. Faults

8.1.1. E0 error: Impossible to read the temperature from the internal sensor

Clean the thermostat openings.

Try to restart it

If the fault persists, replace the thermostat

8.1.2. E1 error: Impossible to read the temperature from the offset sensor

Check the sensor connection: use an ohmmeter. Measure the ohmic value of the sensor, make sure that the ohmic value is about 10kOhm at 25° C. Otherwise, make sure that the cable is not cut or that the connections have been properly made.

8.1.3. The date is no longer saved when not powered

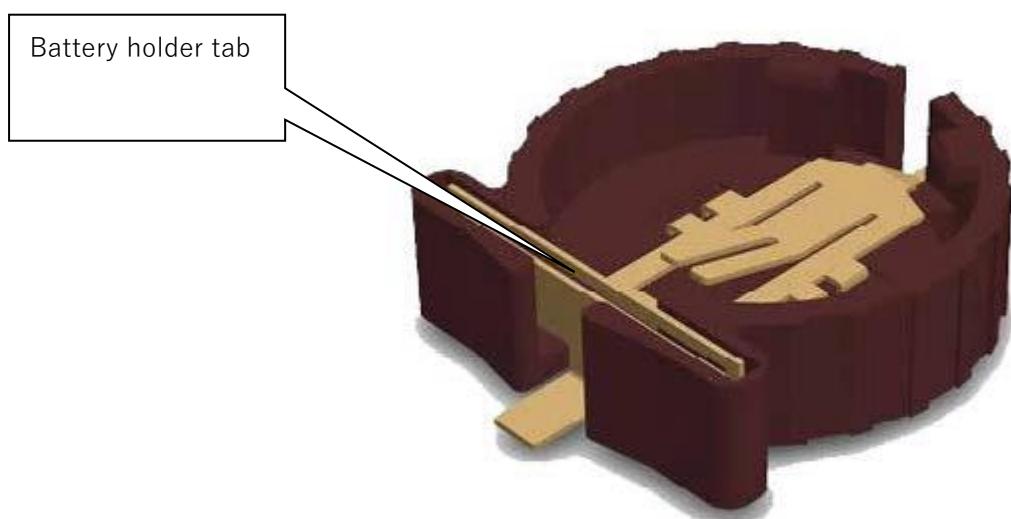

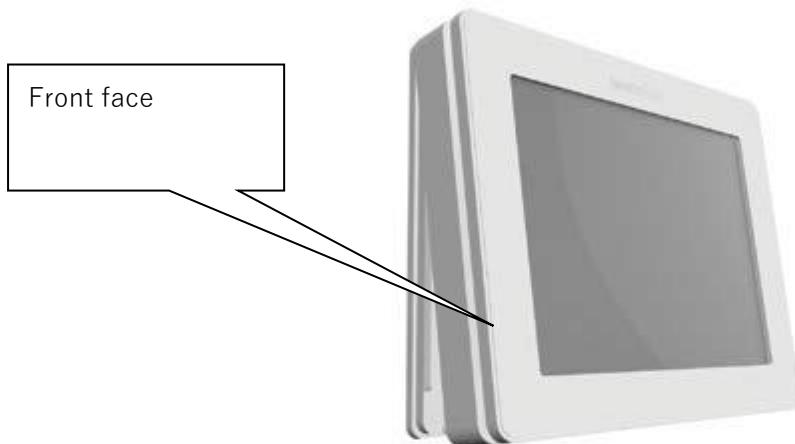

SOLARONICS Chauffage SAS. 78 rue du Kemmel – CS20302 – 59429 ARMENTIERES CEDEX France
Telephone: 03.20.10.59.59 - Fax: 03.20.35.57.22
Website: <http://www.solaronics.com/>

Replace the thermostat battery:

Cut the electrical power supply to the thermostat

Loosen the screw underneath the thermostat front

Carefully remove the front face

Replace the battery

Carefully put back the front face of the thermostat

Tighten the screw underneath the front face

Restore the electrical power supply

Reset the thermostat

SOLARONICS Chauffage SAS. 78 rue du Kemmel – CS20302 – 59429 ARMENTIERES CEDEX France
Telephone: 03.20.10.59.59 - Fax: 03.20.35.57.22

Website: <http://www.solaronics.com/>

9. Technical characteristics

Power supply: 230 V, 50 Hz
Class 1 isolation
Powered output: 3A 230 V
Storage temperature: -10° C to +50° C
Operating temperature: 0° C to 40° C
Dimensions: L x H x D = 147 x 155 x 90 mm
IP 20
Installation in a normally polluted environment
3V CR1220 lithium battery for data saving
